

Ocean Decade Laboratory - Blue-Cloud: Developing a virtual environment for open science to tackle ocean challenges

11 May 2022

Sara Pittonet Gaiarin, Trust-IT, Blue-Cloud coordinator

Blue-Cloud: the Marine thematic contribution to European Open Science Cloud (EOSC)

Blue-Cloud aims to promote the **sharing of *data, processes and research findings*** in the marine domain by delivering a **collaborative web-based environment** that enables *open science*, underpinned by simplified access to **an unprecedented wealth of marine data resources and interoperable added-value services and products**”

Funding: H2020: The ‘Future of Seas and Oceans Flagship Initiative’
(BG-07-2019-2020) topic: [A] 2019 - Blue Cloud services
October 2019- September 2022
20 partners + **13 Blue federated Infrastructures**

DECODE THE OCEAN!
